Inclusive Mobility: Themes

Our vision is for equitable mobility and access for all people regardless of their ability, background or circumstance. Through our Inclusive Mobility Program, AITPM will lead the transport community to create inclusive places, systems and networks.

Societal change to enhance the places where we live, work and play

Advocate for standards — Processes — Discussion

Accessible Design	Equitable Mobility	Safety	Social Inclusion	Strategic Connectivity / Integration
Engineering practices that allow people with diverse mobility needs to enjoy seamless, direct journeys.	Policy and planning that recognises diverse circumstances and provides fair transport outcomes.	Provision of access to preferred destinations with the wellbeing and comfort of people at heart.	Strategies for public realm and transport networks that facilitate full participation in society for all.	Connectivity and mobility for all in an integrated, accessible transport network.
• Transport infrastructure and services are fully available for all transport network users. • Facilitating end-to-end journeys, through: – Accessible information and wayfinding – Accessible service and infrastructure options – Inclusive trip planning	• Transport system in all suburbs that provides for equitable mobility: – Efficient public transport – Regular maintenance • Effective investment that: – Supports access for all across all modes – Creates affordable transport options for all	• A safe transport system for all users that reflects modal hierarchy and road space allocation policies • Proactive network analytics and management using the Safe Systems approach • Planning and design to cater for vulnerable users • Create personal safety at public transport stops, interchanges and stations	• Raise awareness of inclusive mobility in the industry • Engagement with a diverse and broad range of users when considering, developing, introducing schemes and standards • Create awareness through practitioner training to cater for a broad range of users	• Improve accessibility and inclusivity and coverage of public transport • Improve connections between active transport and public transport • Provide easy-to-find / read trip and facility information for all transport network users

All themes consider a broad range of users who may identify with one or more of a range of characteristics, including physical disabilities, hidden disabilities, temporary disabilities, neurodiversity, gender diversity, different socio-economic backgrounds, ages, ethnicities and those with caring responsibilities. We recognise the importance of intersectionalities and the promotion of systemic inclusion.
