About AITPM

The Australian Institute of Traffic Planning and Management Ltd (AITPM) is the peak body for traffic and transport practitioners in Australia.

We provide a central point of reference for practitioners in traffic and transport planning and management and have developed a niche position within the industry thanks to our concerted focus on the quality and level of engagement of our members.

From humble beginnings in 1966, the AITPM network is now extensive, with a database of more than 5000 practitioners receiving and accessing services and events. Our underlying strength is our membership. With current growth of more than 10% p.a., we now represent more than 1500 active individual and organisational members across Australia and New Zealand. Members of the Institute are linked primarily by a common vocational interest rather than by similar academic qualifications alone. We engage practitioners in the public, private, academic, and not-for-profit sectors, with members having diverse backgrounds and experiences, in fields of practice including:

- ◆ Traffic Engineering
- ◆ Transport Planning
- ◆ Traffic Modelling
- ◆ Transport and Land Use Modelling
- ◆ Active Transport
- ◆ Transport Policy
- ◆ Road Safety
- ◆ Traffic/Transport Research
- ◆ Intelligent Transport Systems
- ◆ Road Design.

Our services and events address this broad range of areas of practice, exposing thousands of practitioners to the latest content, innovation, and technical perspectives every month.

While we are a truly national organisation, working together to share and grow the industry's body of knowledge to ultimately improve transport outcomes for all communities, our state branches are the local engine rooms of our activity. Our Branches support the local delivery of services on the ground in:

- ◆ Queensland
- ◆ New South Wales, also servicing the Australian Capital Territory
- ◆ Victoria, also servicing Tasmania
- ◆ South Australia
- ◆ Western Australia.

Our ambitious vision for the industry

As the peak body for traffic and transport practitioners in Australia, it is our vision, that working together, the industry can achieve a sustainable, efficient, safe, multimodal transport system that is accessible by all communities.

To contribute to the achievement of this ambitious vision for the industry, our mission is to lead our members and practitioners to connect, collaborate, participate to advance their skills, capabilities, and knowledge. In doing so we will be focused on:

- ◆ **Community** | AITPM will grow a strong, connected, and supportive community of practitioners to enhance the resilience and capacity of the industry.
- ◆ **Collaboration** | AITPM will facilitate collaboration and engagement across the industry to influence better outcomes.
- ◆ **Capability** | AITPM will grow industry capability through sharing and developing knowledge and experience.
- ◆ **Governance and Organisational Excellence** | AITPM will ensure the correct operational enablers are in place to allow us to fulfill our mission and objectives

The AITPM is inviting likeminded organisations to partner with us in the achievement of this vision for the industry.

We are seeking local partners that believe in collaboration, and that will work with us and our community of traffic and transport practitioners to grow the capability of the industry in each of our states and territories.

We are seeking to partner with both our government departments, infrastructure, and public transport agencies, as well as with our major local governments and private sector consultancies.

Partner for growth

Partnering with the AITPM is an investment in the advancement of the traffic and transport industry, through supporting the enhancement of services, products, and knowledge.

Our partners are respected in the industry within their jurisdiction for the investment they make and through our promotional and profile opportunities, their brands are recognised within the local industry as leaders.

Our partnerships provide the opportunity for our partner organisations to showcase the talent, experience, and achievements of their teams amongst their industry peers and clients, building connections and strengthening their position as local leaders.

At a Branch level AITPM offers three key types of partnership: Principal State Partner, major Branch Partner, and Branch Supporter. Each provides a range of benefits that are focused on enabling our local partners to support the local industry by showcasing the talents and experience of their teams, while providing differing levels of engagement to suit the exposure that you desire.

We invite you to partner with AITPM and support the local industry.
